

FREE DATA RISK ASSESSMENT

Deep dive into your data landscape
with Smarttech247

KNOW YOUR DATA TO SECURE YOUR DATA

Get a comprehensive exploration of the data landscape within your organisation with Smarttech247 Data Risk Assessment. With this assessment, we undertake a thorough analysis to identify, categorize, and evaluate the risks associated with all your data assets and provide you a comprehensive 5-page report including an in-depth analysis of data assets. The report will highlight potential vulnerabilities & risks and outline a clear roadmap for achieving data security excellence.

IDENTIFY SHADOW DATA

Identify shadow data that is not properly classified, secured, or managed, posing risks to the organization, and get expert recommendations on implementing appropriate controls and managing access to data.

MANAGE OVERPRIVILEGED USERS & ACCESS

Know excessive or unnecessary permissions and privileges beyond what is required and discover sharing of sensitive information through insecure channels posing high risks to data privacy, security, and regulatory compliance.

KNOW YOUR DATA EXPOSURES

Know the risk of your data that is confidential or private but is inadvertently or intentionally made accessible to unauthorised individuals or entities increasing the risk of data loss and data breach.

With Smarttech247 Data Risk Assessment, you get:

- Comprehensive examination of your data landscape.
- Insights into critical files, PII, shadow data, sensitive files, ROT, retention metrics, exposed and overshared data, and duplicates.
- **5-page comprehensive report** outlining actionable next steps, critical risks and expert recommendations.
